

Safe closing systems for your dangerous goods containers.

We engineer, supply and maintain proven and fully automatic closing systems for the filling process of your containers. With TopExpand and FlexoClose we are currently offering two closing systems for closing your dangerous goods containers.

FLEXO CLOSE.

TOP EXPAND.

BY THE WAY: Did you know that when importing dangerous goods packaging the importer is liable if packaging does not comply with the scope of certification in practice?

German Transport of Hazardous Goods Law (GGBefG), Article 9, Supervision (5)

No compromises when it comes to packaging for your dangerous goods.

The safety in transport and storage of dangerous goods on all transport routes is essentially determined by the quality and reliability of the packaging used.

Let's play it safe.

HUBER Packaging offers you the broadest range of type-tested packaging from tinfoil for your dangerous filling goods. Dangerous goods packaging from HUBER Packaging are solid, safe, impermeable, UV-resistant and fully recyclable.

Depending on the type of packaging we produce UN packaging with X or Y marking, for filling materials up to density 2.7 g/cm³ and with an inside pressure of up to 250 kPa.

Please ask for our general catalogue.

We shall be glad to advise you individually.
